The Stratagems and the Aqueducts of Rome Frontinus

Frontinus' *Stratagems* is a collection of examples of military stratagems from Greek and Roman history, which the author comments based on his own experience as a general in Germania. Many of the stories he tells can also be found in other Roman authors like Valerius Maximus and Livy. His most famous work however is *De aquaeductu*, *The Aqueducts of Rome*, an official report to the emperor on the state of the aqueducts of Rome, in two books. It presents a history and description of all the nine aqueducts that provided the water-supply of Rome in the first century, as well as information about the laws relating to its use and maintenance, and the quality of water delivered by each.
